

*Output*

```
classDiagram
    class Output
    class ParameterEstimationReport {
        taskRef: SIdRef
    }
    Output <|-- ParameterEstimationReport
```

The diagram illustrates a class hierarchy. At the top is a box labeled 'Output' in italics. Below it is a box labeled 'ParameterEstimationReport' in bold. A vertical line with an open triangle arrowhead points from the 'ParameterEstimationReport' box up to the 'Output' box, indicating inheritance. The 'ParameterEstimationReport' box has a second section below the main title containing the text 'taskRef: SIdRef'.

**ParameterEstimationReport**

taskRef: SIdRef
