

Plot

```
classDiagram
    class Plot {
    }
    class ParameterEstimationResultPlot {
        taskRef: SldRef
    }
    class WaterfallPlot {
        taskRef: SldRef
    }
    Plot <|-- ParameterEstimationResultPlot
    Plot <|-- WaterfallPlot
```

The diagram illustrates a class hierarchy. At the top is the ***Plot*** class, which has a diagonal hatched pattern in its top-right corner. Below it are two subclasses: **ParameterEstimationResultPlot** and **WaterfallPlot**. Both subclasses have a single attribute, **taskRef: SldRef**. A solid line with an open triangle arrowhead connects each subclass to the **Plot** class, indicating inheritance.

ParameterEstimationResultPlot

taskRef: SldRef

WaterfallPlot

taskRef: SldRef
