

Calculation

```
classDiagram
    class Calculation
    class DataGenerator {
        id: SId { use="required" }
    }
    Calculation <|-- DataGenerator
```

The diagram shows a class hierarchy. At the top is a box labeled 'Calculation' in a bold, italicized font. Below it is a box labeled 'DataGenerator' in a bold, plain font. A vertical line with an open triangle arrowhead points from the 'DataGenerator' box up to the 'Calculation' box, indicating that 'DataGenerator' inherits from 'Calculation'. The 'DataGenerator' box has a third section at the bottom containing the text 'id: SId { use="required" }'.

DataGenerator

id: SId { use="required" }
