

Calculation

```
classDiagram
    class Calculation
    class DataGenerator {
        id: SId { use="required" }
    }
    Calculation <|-- DataGenerator
```

The diagram shows a class hierarchy. The top class is 'Calculation', which has a blue diagonal striped corner in its top-right. Below it is the 'DataGenerator' class, which contains an attribute 'id' of type 'SId' with the constraint 'use="required"'. A vertical line with an open triangle arrowhead points from 'DataGenerator' to 'Calculation', indicating that 'DataGenerator' inherits from 'Calculation'.

DataGenerator

id: SId { use="required" }
